Silk Rubber Sport Hats—Paraffin in Old Teakettle—Some New Methods of Preparing and Serving Potatoes—Many Ways to Make Salads With Potatoes Included.

SILK RUBBER FOR SPORT HATS.

One of the most novel materials used in the manufacture of sport hats is silk rubber such as bathing caps are made of. It comes in a most attractive range of vivid colors and yet the material, with its soft finish, in pink, resemble the skin of a peach. This fabric cannot be stretched to sew, for naturally it would tear, but it lends itself nicely to draping effects, and when the entire top of the hat is draped with rubber it makes it waterproof. Painted designs are possible on the rubber, and, by the way, to match the hats are sport coats made of rubber, but these are glued together instead of sewn.

PARAFFIN IN OLD TEAKETTLE.

When using paraffin melt in an old tea or coffee pot and you will be interested to see how easy it is to pour the contents of the pot into jelly glasses or other receptacles after they have been filled and need to be sealed. No scattering drops will sprinkle the floor and your apron.

NEW POTATO METHODS.

New potatoes, when they are still a little unusual, are a very interesting vegetable. Here are some of the

methods of preparing them that add to their interest.

One of the best ways of cooking them is to steam them. They should be freed from skin and placed in the top part of a steamer and cooked until they are tender.

A good way to boil new potatoes is to scrape them and put them in cold water with a sprig of mint and then boil them till done. The mint adds a delicious flavor.

Boiled or steamed new potatoes can be rolled in melted butter and chopped parsley, and sprinkled with pepper and salt.

Fried new potatoes are novel prepared in this way: Scrape the potatoes and then with a sharp knife begin cutting them as if you were paring them, around and around in a long spiral. Fry this in deep, hot fat. The spiral should be as long as possible.

A good dish for luncheon or for the hearty breakfast is made by cutting cavities through the center of new potatoes, filling the cavities with sausages or sausage meat, placing them in a dripping pan, covering with thin

slices of bacon and cooking in the oven, basting the potatoes from time to time with the fat.

Salad made from new potatoes is better than that from old. One way to make it is to cut the boiled new potatoes into dice and mix with well-seasoned mayonnaise.

Another is to mix them with small beets, boiled and equal in size to the potatoes, sliced thin in whole slices. These slices should be dressed with French dressing and a little onion juice.

Celery, a third as much as potato, can also be mixed with potatoes, diced, for salad. Mayonnaise should be used with this sort of salad.

Tart apples are good mixed with potatoes for salad, and green and red sweet peppers are also good in combination with new potatoes for salad. So are cucumbers and boiled green peas.

A little minced parsley and onion juice often add to the flavor of potato salad. The onion, of course, must be added with care.

Feel grouchy? Then come to The Ogden and see "The Habit of Happiness" and Chaplin's "Carmen." They'll cure you.

PRESIDENT SENDS REPLY TO POPE

Washington, May 17.—President Wilson has replied to the message sent him recently by Pope Benedict in which the pope expressed the earnest hope that war between the United States and Germany would not be precipitated by the submarine issue and conveyed the impression that he hoped the United States might be of assistance ultimately in restoring peace to Europe. The reply of the president was conveyed through Monsignor Bonzano, the apostolic delegate here, who delivered the pope's message to the White House.

White House officials refused to discuss the pope's message or the reply of the president, but in other quarters it was indicated the exchange of message had only remotely to do with the question of peace in Europe.

At the White House it was said nothing was known of the mission to this country of Secretary Grew of the American embassy in Berlin, who is now on his way to the United States. It has been suggested that possibly he might be bringing a message from Emperor William to President Wilson.

DAUGHTERS OF PIONEER PLANNING FOR PIONEER DAY

At a special meeting to be held tonight in the city hall, plans for the municipal Pioneer Day celebration will be discussed. Arrangements for the celebration in which, it is expected, all of the communities in Weber county will participate have been started by the Daughters of the Pioneers.

A general committee composed of Mrs. Chris Flygare, Mrs. Dr. Jos. R. Morrell and Mrs. Dr. E. I. Rich was appointed at a recent meeting of the general board, Daughters of the Pioneers, to have charge of the program as representatives of that organization. The committee was authorized to increase its membership to 25, and sub-committees will be named from this augmented committee.

DAVID JENKINS FUNERAL HELD

The funeral of David Jenkins was held yesterday in the Lindquist chapel, with Rev. G. F. Rassweiler officiating. Mrs. Rassweiler sang "Near, Still Nearer" and Leslie Saville sang two solos.

Rev. Rassweiler took for the text of his sermon, Psalms 90:17, "And let the beauty of the Lord, our God, be upon us and establish the work of our hands upon us, yea the work of our hands establish thou it." In part, he said:

"We all long for some sort of immortality. We do not want to live in vain. In some way we long to leave something substantial and enduring behind us. Some seek to leave behind them a famous name to perpetuate themselves. Others seek in descendants to keep their names and race in perpetuity. Others, seek to produce something so useful or great that it will continue to carry on their

Give Those Worn Nerves a Rest

Housewives who are often "all unstrung" are apt to think it due entirely to family cares.

But nervous troubles often come from kidney weakness, and then the best help for it is to help the kidneys.

When the kidneys are slowed up from a cold, or some unseen cause, their work of filtering the blood is hindered. Poisonous uric acid, which the kidneys should throw off, clogs the blood, and the nerves are constantly irritated.

Uric acid poisoning causes nervousness, "blues," crossness, worry, headaches, dizzy spells, tiredness, rheumatic pains, and indigestion, and, if allowed to run on, heart disease, dropsy, gravel and Bright's disease.

Doan's Kidney Pills have helped thousands of tired, nervous women. They are good for backache, too.

and for bladder troubles, and are harmless.

Ogden Proof

Mrs. Charles W. Adam, 2717 Quincy Ave., says: "Heavy lifting at my work was responsible in a measure for trouble I recently suffered with my kidneys. My back became lame and tender and a dull ache there constantly annoyed me. The kidney secretions were also unnatural and pained so that I knew my condition was serious. I began taking Doan's Kidney Pills, procured at the Culley Drug Co. and five boxes brought me a cure."

"When Your Back is Lame—Remember the Name"

activities long after they have departed. However, there are so few of us who can invent a great contrivance or write a masterful book, or compose an undying poem. What can we do to make our lives live after we are gone? There is something more undying than knowledge, or inventions. Paul says love is the most eternal thing, and we all can love and do deeds of loving kindness, and thus make our lives immortal in their influences.

"We are reminded this afternoon of how much of hatred there is in the world. How many lives are being sacrificed to malice and greed and jealousy? How and when will men learn to live together in unity and peace? Some think that day will be brought in by some cataclysm of Christ coming in the clouds, some by a change of circumstances or by a change of the system of government and industry. However important these are, there is another way by which it is being established in our midst. This kingdom of love is being built up in many individual lives. How are we reminded this afternoon of love and sympathy by the presence here of friends expressing their mutual sorrow, and by the gifts of these flowers. So we can all establish the work of our hands by making our lives full of loving deeds.

"There was that young mountaineer by the name of Burns who was born in the Kentucky mountains where perpetual feuds divided men into battling clans. He, while away from home learned the love of the Christ who prayed 'Father, forgive them for they know not what they do,' and went back not to square accounts with his enemies, but to teach love and fraternity. He got people to lay aside their old scores for at least a year and gathered the children together into a school, with the result that today the community is one of peace and loving fellowship and that school has grown to a college, and Burns has set moving forces which will go on throughout eternity.

"But still more do we want our lives to be established in immortal personal life beyond the grave, which Christ has made possible for us."

NEW SEAL LAW AT NEW FOUNDLAND

St. John's, N. F., May 17.—As a result of one of the most successful seal hunting seasons on record, the Newfoundland legislature has enacted restrictions designed to prevent the extermination of the animals in the waters about the island. Under the new law large steel steamers such as have been used extensively during the last few years are prohibited from engaging in sealing. Most of these vessels were sold to the Russian admiralty last year for use as ice breakers, but one, the Florizel, which participated in the season's hunt, took 45,000 pelts, the largest number ever secured by a single ship and yielding a profit of \$130,000. The new restrictions will make it impossible to use a vessel capable of carrying more than 25,000 pelts. The total catch for this season was 295,000 seals valued at \$650,000.

METHODISTS VOTING FOR SEVEN BISHOPS

Saratoga Springs, N. Y., May 17.—Balloting for the seven new bishops of the Methodist church was continued at the general conference of the denomination today. None of the candidates received the necessary two thirds vote on the first ballot taken yesterday. The report of the tellers showed that of the more than 262 candidates, Rev. Dr. Thomas Nicholson, secretary of the board of education, was the leader with 412 votes. Others were Charles B. Mitchell, Chicago, 337; Matt S. Hughes, Pasadena, Cal., 333; Franklin Hamilton, chancellor of the American university, Washington, D. C., 232; A. W. Leonard, Seattle, 229; Herbert Welch, president of Ohio Wesleyan university, 223; Ezra S. Tipton, president of Drew Theological Seminary, 225; Charles E. Locke, Los Angeles, Cal., 237; William H. Oldham, secretary of the board of foreign mission, 199; Joshua Stansfield, Indianapolis, 178; William H. Crawford, president of Allegheny college, Meadville, Pa., 150; E. G. Richardson, Brooklyn, N. Y., 149; Horace L. Jacobs, Williamsport, Pa., 145; R. E. Jones, editor of Southwestern Advocate, New Orleans, La., 116; L. J. Birney, dean of Boston University Theological school, 111.

PLOT, LIAISON, CONFSSIONAL, GOLD AND WRONGED GIRL FIGURE IN CHICAGO SUIT

Mrs. Anna L. Matters (sketched in court).

Mysteries, alleged liaisons, betrayed innocence, fake operations, unexplained sudden death, the powerful force of the confessional, perjury, guilty conscience, founding babies—all this is woven in the testimony at a suit in Chicago at which an attempt is being made to show that Mrs. Anna L. Matters is not the mother of the baby which she calls hers, and which she had hoped would help her get possession of the property of her dead husband.

Cook your next Griddle Cakes with

CRISCO
For Frying—For Shortening—For Cake Making

and you always will want them that way

In Crisco they cook so quickly that very little of the Crisco is absorbed. But, at the same time, because of its vegetable origin and natural wholesomeness, it gives them a delicate richness and pleasing flavor. The result is, your cakes are free from any fatty, grease-soaked taste and are extremely appetizing, delicious and easy to digest.

For any kind of shallow frying—eggs, waffles, meats, etc., or for any kind of deep frying—French fried potatoes, croquettes, doughnuts, etc., Crisco eliminates all the usual objections to fried foods and produces as wholesome, delicate and savory dishes as baking or broiling.

In addition, Crisco has other advantages in frying which mean a great deal to the cook. It stands a so much higher temperature than lard without burning that it does not fill the kitchen with smoke nor scatter black specks on the food. Then, its use means a great saving because it does not absorb odors or flavors and therefore can be used and re-used as long as a particle remains.

Spring Toggery for Little Folks

Cape Collars Give Little Coats a New Interest—Checked Frocks Brightened With Silk Trimmings—Party Dresses of Pastel Tinted Pussy Willow

BECAUSE of the scarcity of fast-color dyes and the consequent advanced prices of fast-color wash fabrics, many mothers will keep their children entirely in white this summer. Of course white play frocks mean substantial bills from the laundress, but of two evils it is wisdom to choose the lesser, and it will be wiser, most mothers will find, to pay a bit more on the laundry account than to cling to colored fabrics that will very possibly fade badly, or worse still, "run" when submitted to the test of soap and water.

The higher priced gingham and plain colored chambrays may be relied upon for fast colors, but when the cost of these materials is considered and balanced against the laundry expenditure it will be found that white frocks are quite as economical as colored ones—and will continue to be while the present condition exists with regard to dyes.

SERGE FROCKS FOR SPRING SCHOOL DAYS

There is nothing like serge, that standby of English and American mothers, for school wear. And navy blue serge continues to be the favorite for practical school dresses though many are being made of gray serge—for gray is fashion's pet color just now. Skirts are pleated or cut in gored with fullness added by box pleats or inverted pleats

here and there, and—except in the middie models, dear to the heart of young girlhood!—waists are mounted over gumpies of washable fabric, like pique, handkerchief linen or batiste. Much style is given to the little frocks by braid bindings, lacings of silk cord through embroidered eyelets, and by original cut of the waist, showing the gumpie in a deep oval or square at the front.

WHITE JACKET INSTEAD OF GUMPIE

A very pretty way of introducing white in a childish school frock is shown in the model of gray and white striped gingham which has a novel white jacket of white pique, cut sharply away above the waistline in front and sloping down to a squared-off edge at the back of the hips. The jacket has a round, turnover collar and white pique cuffs are basted in the sleeves so that they may be removed for laundering with the pique jacket.

The idea can be carried out most attractively in connection with a frock of dark serge or mohair; one extremely smart little model along these lines is of hunter's green worsted and mohair mixture—a lustrous, flexible material ideal for children's dresses—with a laced jacket of tan-colored faille classique silk, the laces, dark green, to match the costume.

SHEPHERD CHECK SUITS WITH GAY COAT LININGS

There is something about fresh crisp new shepherd checked material that makes it most satisfactory for children's wear in springtime. Coats and little suits of shepherd checked worsted have white pipings and white pearl or bone buttons and color is introduced into the costume by a charming hat; and by a gay silk coat lining to match the hat. Pussy willow silk in a brilliant coral shade is a favorite lining for smart little coats; bright geranium red is another popular color; reseda, tan and Nattier blue have favor also.

SMALL PETTICOATS DISTENDED IN PROPER FLARE

Party dresses and afternoon frocks of airy lingerie material for the little girl imitate the grown-up silhouette in bouffancy. Sheer frocks are worn over one or two petticoats made to stand out by ruffles starched lightly before the ironing; but real stiffening is introduced in little coats by facings of a new resilient material that has a flexible, elastic quality combined with extreme lightness. Party frocks of silk are distended by many cordings run close together. A pretty notion is to set six or eight of these cordings just above the hem, and two cordings at the waistline, these up-cords drawing in the full skirt to a trim fit around the waist in lieu of sash or belt.

Georgette crepe and pussy willow taffeta in pastel shades are combined in dressy little frocks, and the same effects are achieved with plain and flowered cotton voile in wash frocks.

Socks and strap slippers will be worn by girls and boys under eleven years old, but in the street long stockings and buttoned boots, either black, white or tan color, look best with spring coats.

New ideas in gingham frocks are always acceptable to the mother. Here is a particularly fetching little model in plaid Scotch gingham and rose-colored chambray, which repeats the dominant color in the plaid fabric. Smocking gives the last note of modishness.

Of pale blue pussy willow taffeta is this charming coat for a wee girl of five. The groups of shirring which give the coat its graceful lines will appeal to every mother as a novel feature, not difficult to copy in the home sewing room. White buttoned boots and stockings complete the dainty costume.

The prevailing favor for gray is evident in this little school frock of gray and white striped chambray, which has a new jumper effect in white pique, laced down the front with navy blue ribbon. The pockets, trimmed with white buttons, are a smart detail.

The wee girl does not need a hoop skirt to give her dancing frock the correct flare, when many cords, run into the material—pale pink faille classique—lend the desired suggestion of bouffancy. The short bodice is of cream lace.
